

Physician Medical Billing and Practice Consulting

Doctors in the U.S. are losing approximately \$125 billion in revenue due to billing errors. This widely reported statistic is largely attributed to the growing complexity of our health care system and the increased challenges in navigating through the various rules and regulations.

What We Do

We provide physician medical billing and practice management solutions that focus on practice profitability.

Who We Help

We provide solutions for:

- Community Hospitals
- Federally Qualified Health Centers
- Independent Medical Physicians and Specialists
- Post-Acute Care Facilities
- Surgical Centers

How We Help

We provide a dedicated reimbursement team who receives continuous education and stays current on rules and regulations, and medical coding and billing practices, which minimizes billing errors, rejections, and denials, and maximizes reimbursements.

We alleviate physicians from staff biller management and turnover, the cost of continual training, the investment in software programs and maintenance, slow cash flow and aid in preventable revenue loss.

How We Help

Arnett Carbis Toothman LLP provides physician medical billing services through our subsidiary company Total Practice Management, LLC. Our healthcare clients range in size from independent physician practices to large hospitals and post-acute care facilities. In addition to traditional accounting services, together we provide specialized services, such as medical billing and practice consulting, Medicare and Medicaid reimbursement consulting, even cyber security and IT services.

Fee Structure

Medical billing services are charged on a percent-basis of the revenue we bring into your practice or facility. The percentage is determined by a number of factors related to your specific establishment. With this in mind, we are diligent about faster collections and resubmitting claims. Accounting and consulting services are charged at an hourly rate.
