How to uninstall update KB4524244

Due to a conflict with some boot loaders this update may make a computer unrepairable should there be an error in the future. Therefore, Microsoft has recalled this update and it must be uninstalled.

If you have any questions, or require assistance, please contact your Harbor tech immediately and we'll be happy to help you.

Please follow the below steps:

1. Select the start button or Windows Desktop Search and type **update history** then select **View your Update history**.

- 2. You will now be at the Settings/View update history dialog window, Select Uninstall Updates.
- Settings

Recovery options
