

## **Ameren just announced an all-time record profit.**

**And our energy bills have never been higher. Now Ameren wants more guaranteed profits than ever.**

Ameren is asking the Illinois Commerce Commission for its biggest rate hike in history. They're trying to cover their tracks by blaming the cheaper, clean energy created by the Climate and Equitable Jobs Act (CEJA) for the hike. **That's false.**

**THE TRUTH: Ameren's profit grab will raise our gas and electricity bills through the roof.**

According to their own press release, Ameren's net income was more than \$1 billion in 2022.

**And that all happened before most of CEJA went into effect.**

**THE TRUTH: Corporate profit-padding and dirty, expensive fossil fuels are driving up our Ameren bills, not the transition to cheaper, cleaner energy.**

## **STOP THE EXCESSIVE AMEREN PROFIT GRAB.**

**Tell Ameren to invest in clean energy,  
not excessive profits.**
