## Turnitin Assignment Not Syncing with Grade Center

This document describes how to fix the error that a Turnitin Assignment is not syncing with a column in a course's Blackboard Grade Center.

This issue may occur when copying Turnitin Assignments from course to course or if the Grade Center column has been accidentally removed.
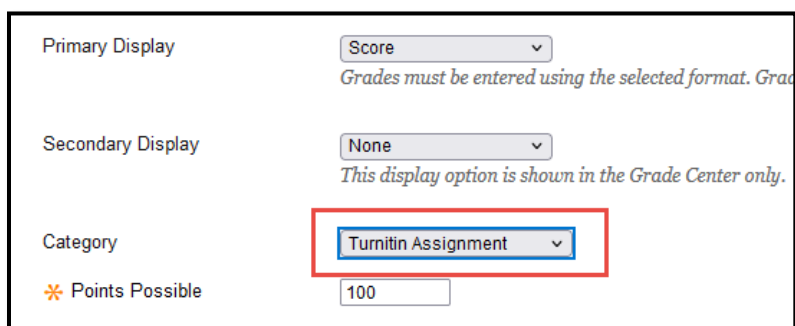

Instructions

1. Access the course's Grade Center and determine if a grade column is present for the Turnitin Assignment.

2. If there is no grade center column present for this assignment, you will need to create a column manually via the **Create Column** button.

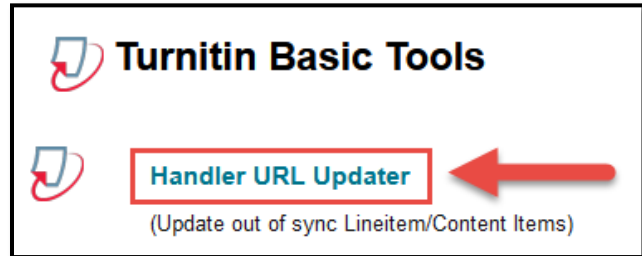

3. When creating a manual column, assign the column to the **Turnitin Assignment grade category** (if needed, this can be adjusted after pairing).

SAN JACINTO COLLEGE

4. Then in the Control Panel under Course Tools, go to **Turnitin Basic Tools** and click on **Handler URL Updater**.
   Note: If the Turnitin Basic Tools is not listed, make the tool available under the **Control Panel** -> **Customization** -> **Tool Availability**.

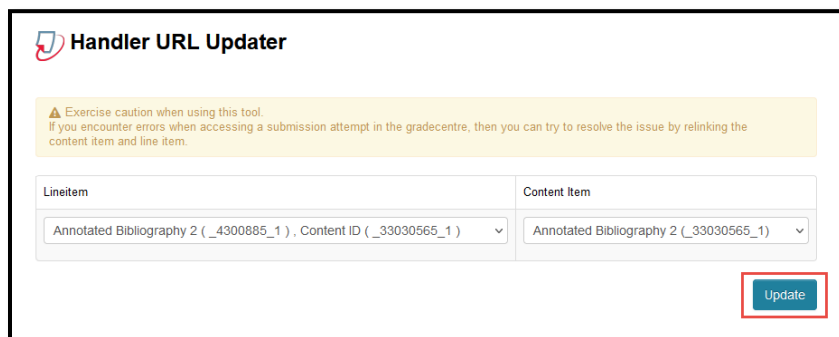

5. Withing each drop-down, find the Turnitin assignment and pair it with the appropriate grade center column.

   - Lineitem = Grade Center Column
   - Content Item = Turnitin Assignment

   Note: Use caution when using this tool. You do not want to pair the wrong assignment to the incorrect grade center column.

6. Click Update.

7. Now go back to **Course Tools**, then **Turnitin Assignments**, and click on the **Sync Grades** option next to the appropriate assignment.
