RE: Palo Alto Networks E-rate Eligibility and Cost Allocation Guidance

To Whom It May Concern:

This letter is to provide guidance on the E-Rate eligibility¹ of Palo Alto Networks' products and services as independently reviewed by a reputable third-party E-rate consultant. Our E-rate guidance under the current program rules is as follows:

- 1) **Hardware:** Palo Alto Networks Hardware (on premise firewalls) are 100% eligible for E-rate funding. High Availability (HA) **redundancy** firewalls are not eligible (e.g. The first firewall in a two firewall set is eligible with the second firewall being ineligible).
- 2) **Virtualized Hardware:** Palo Alto Networks Virtualized Firewalls like the VM-Series are considered E-rate eligible if they provide the same functionality as eligible hardware.
 - Software NGFW Credits to deploy VM-Series, CN-Series, Subscription Services, and Virtual Panorama to manage Software Firewalls are 70% e-rate eligible
- 3) **Virtualized Hardware Bundles:** Palo Alto Networks Virtualized Firewall Perpetual bundles are 68% e-rate eligible.
- 4) **Subscriptions:** Palo Alto Networks Software Subscriptions, which are purchased separately from the base hardware that enable advanced or next generation security features, are typically deemed ineligible for E-Rate funding (e.g. Autofocus, Threat Prevention, URL filtering).
- 5) **Wildfire:** Wildfire sandboxing functionality is 100% E-rate eligible under internal connections. It is part of the suite of firewall applications that powers inline machine learning modules on our Next Generation Firewall (NGFW) to instantly prevent new unknown file-based threats without any productivity delay.
- 6) **7000 Series Support Cards:** Switch Management Cards, Log Forwarding Upgrade Cards, and Network Processing Cards purchased alongside a 7000 series firewall are 100% e-rate eligible.
- 7) **SD-WAN (CloudGenix):** SD-WAN functionality is 100% E-rate eligible:
 - a) If a service provider is offering a WAN transport service bundle that includes SD WAN functionality where there is no separate identifiable price associated with the SD WAN functionality then this could be reviewed as ancillary to the eligible WAN service (Eligible under Cat 1); or
 - b) If an applicant has existing WAN transport and they are looking to add SD WAN service/functionality, then it would be considered a Category 2 request. SD-WAN as a separate or stand-alone functionality is considered Category 2.

¹ Palo Alto Networks' statements about eligibility are informal guidance, based on product functionality and the provisions of the current Eligible Services List. Final determinations of eligibility are made by USAC and can be impacted by E-rate program requirements and applicant-specific factors such as where the product is installed, who uses it, and how it is used. See <http://usac.org/sl/applicants/beforeyoubegin/eligible-services-list.aspx> for a link to the Eligible Services List and a glossary of terms.

- 8) **Support:** Palo Alto Networks Standard support for the base hardware is considered eligible for E-rate funding. E-rate also covers limited software support for bug fixes/patches on eligible components only.
- a) If Premium or Platinum Support are desired, the end user must cost allocate by applying for funding equal to the corresponding standard support SKU.
 - i) Example: End user purchases PAN-PA-5220 and wants 1-year Premium Support.
 - (1) Cost for 1-year Premium Support = \$8,000
 - (2) Cost for 1-year Standard Support = \$6,000
 - (3) \$6,000 or 75% of the Premium support is E-rate eligible
 - b) Applicants can apply for funding for multiple year support SKUs, but reimbursement will have to be applied for on an annualized basis. The reimbursement is based on the SKU eligibility divided by the number of years. For example, if the applicant is applying for reimbursement for a 5-year premium support SKU where the E-rate eligibility is 65%, each year is eligible for 13% E-rate funding.
- Disclaimer:** This example is illustrative and not indicative of the eligibility percentage for every premium or platinum support SKU. Partners will need to cost allocate by using the latest MSRP price list to determine the eligibility of any platinum or premium support SKU.
- 9) **Warranty:** Hardware warranty coverage above and beyond what is included in the base cost by the manufacturer are deemed ineligible for e-rate funding.
- 10) **Onsite Spares:** Onsite spares are ineligible for e-rate funding.
